Islam21 Programme is pleased to announce a two day intensive course for the first time in London, UK:

LIFE: THE QURANIC PROGRAMME

Islam21 Programme is running a unique educational project designed for Muslim youth (aged 18-30). This project is currently running an innovative course which seeks to empower Muslim youth and instil in them the drive, self-belief, knowledge and skills that will enable them to maximise their potential as well as succeed in all aspects of their life; private, community, educational and professional. Using an approach deeply rooted in the Quran, Neurosciences and Applied Psychology, we assist and train participants in re-programming their mindsets in order to emerge with refreshed and invigorated attitudes towards their religion, self-view, time and life.

This unique course is being held in English for the first time, and you have an opportunity to see for yourself why this highly acclaimed course has already had so much success in its Arabic version.
